CONSTRUCTION

one screw any job

Super tough HiCo all purpose screws for any timber, inside or out, engineered for driving without pre-drilling.

HiCo
STEEL

Perfect for builders, carpenters, landscapers and all construction trades for driving straight into standard timber battens, carcassing, structural sections, plywood and sheet timber without pre-drilling.

Razr All Purpose Construction Screws

As low as just
\$2.95
per 100

All-purpose Razr construction screws for internal and external building and carpentry. These high performance screws are designed to be used anywhere, inside or out and for use with impact drivers and powerful screwguns. Plus they're coated in our Screw Armour ceramic coating so you can use them in any timber, treated or not. Made from HiCo steel and fully case hardened these screws are as tough as it gets and will not snap, even in the toughest timbers.

Bugle Batten Screws For Wood

Scrooz price as low as

\$11.20

per 100

Gold
Zinc

Gal

304
Stainless

Our hex drive bugle batten screws are made to our own high performance specifications, includes features like ensuring the coating is thick enough to provide excellent corrosion resistance but not too thick to blunt the tips and fill the screw driver recess, we make our type 17 self drilling screw slash points as sharp as possible to prevent screw 'walk' and our bugle underhead profile is shaped for optimum performance to self countersink tight and fast.

Gold
Zinc

Plasterboard and drywall self drilling screws from our high performance metal tek screw range. Features include rounded bugle countersunk heads to prevent damage to the paper skin and prevent pull through during fastening. Twin thread shank and a metal self drill point for fastening plasterboard, gyprock and drywall sheeting direct to light gauge steel. Also suitable for general purpose fixing to metal where a slim shank self drilling tek screw is required.

per 100

Ceramic Coat

FibreFix is made with a specifically engineered and sized point to dig and rapidly drive it's way through the fibre cement material without blunting the screw or over-enlarging the fixing hole and leaving the board loose, it also self drills into timber and pierces steel (up to 1mm) and hard materials easily, without pre-drilling. The head features a large flat wafer profile with deep set chamfered underhead ribs to allow the screw head to self countersink and bury flush in the board.

Bright
Zinc

Spacer screws are innovative high strength fasteners designed to provide a rapid solution for levelling, plumbing and adjusting timber battens, structures, sections, sheets, window and door frames and general construction timbers. They are a self-drill and drive screw requiring no pre-drilling and once fixed they offer continuous adjustment of the face material until the desired level or plumb is achieved, add shims or packers then tighten to secure, super fast and simple.

Gal

Class 3

Scrooz Wing Tip screws are professional grade high performance self drilling fasteners for fixing timber to metal in a single operation without the need for pre-drilling. Manufactured with a ribbed countersunk self embedding head giving a flush finish in the timber. Ideal for fixing timber boards and sheets, battens, decking and general timber to steel sections. No2 square drive for a positive connection avoiding 'tear out' and Class 3 galvanised for corrosion protection.

Self Tapping Undercut Screws

As low as

\$1.95

per 100

Hardened countersunk self tapping undercut screws (also called hinge screws) from our high performance screw range. The countersunk head is cut away mid point to give a flat bottom as opposed to a full taper. This allows the screw to sit flush in a thin countersunk metal plate, usually a hinge or bracket. The reduced head thickness allows a flush fit in the component without bottoming out on the substrate. Also available in stainless steel for maximum corrosion protection.

Screw Dog Fixings for Plasterboard

As low as
\$9.90
per 100

Bright
Zinc

Screw Dogs are universal multi-use, multi-substrate screw fixings designed for fast light duty fixing direct to gyprock, timber and sheet materials without plugs or sleeves and with no expansion. They're easily and rapidly installed into plasterboard with the sharp point and aggressive thread providing a strong hold without pre-drilling. Screw Dogs are removable and re-usable. Phillips drive.

Gold
Zinc

Spring toggle bolts are a spring loaded plasterboard cavity fastener designed for medium duty applications into hollow walls or hollow wall sections. They work by way of expansion, the spring loaded wing portion of the anchor is folded and inserted into the plasterboard wall or cavity, on tightening the cavity the wings expand against the inside of the cavity wall. Phillips No 2 drive.

Bright Zinc

Hollow Wall Anchors are expansion cavity fixings used to fasten fixtures to plasterboard walls and other board materials where a cavity is present. The clamping action provides a very strong anchor point spreading the fixture load by deforming to an umbrella shape behind the board and preventing pull-through when tightened, includes captive phillips drive low profile zinc plated roundhead screw.

GRIPR

HEAVY DUTY PLASTERBOARD FIXINGS

These European manufactured, fully tested heavy duty plasterboard fixings are simple to use, fast to install and are at least twice the strength of any currently available gyprock fixings in Australia. Recommended by leading European plasterboard manufacturers Grip'r's can be used in filled or insulated cavities as well as other boards such as fibre cement sheet, timber and man-made boards and can even work on tiled walls.

Worlds strongest plasterboard fixings

- Holds up to 32kg per fix in single boards with a huge 55kg rating in double boards.
- Designed for medium to heavy loads in plasterboard but suitable for any application.
- Torx 25 star drive for a high torque positive connection, free drive bit in each pack/box.
- Manufactured from high strength PA6 nylon and reinforced glass fibre.
- Fixes everything from lightweight brackets to kitchen units, grab rails and air con units.
- Supplied and packaged exclusively for Scrooz Australia.

Gripr Heavy Duty Plasterboard Fixings

From only
\$35.95
a pack

Bright
Zinc

The superb Gripr+ anchor, it's the World's strongest plasterboard fixing, able to carry huge loads in plasterboard and sheet materials. The range comprises Orange for single boards and Black for double boards or tiled walls. They are perfect for fixing to walls where high strength fix is required and timber studs/battens or masonry can't be found. Ideal for grab rails, toilets, baths, kitchen cabinets, furniture and heavy fittings, fire equipment, engineering and structural assemblies.

ClipFix Masonry Fixings

Get them as low as

\$9.95

per 100

Clipfix anchors are revolutionary fixings, they are part of the Raptr screw family and are designed specifically for fast fixing direct to concrete, brick, block and general masonry without any plugs or sleeves and with no expansion. They are easily and rapidly installed by just drilling a 4mm hole and then driving the anchor in using power screwdrivers and impact drivers. Clipfix anchors are 5mm diameter with a 5/16 drive. Perfect for conduit clips, steel battens, pipe clips, cable trays, tracks and brackets.

Raptr Self Tapping Concrete Screws

Get them as low as
\$10.85
a pack

These revolutionary high performance fixings are designed to fix direct to masonry and concrete without any plugs or sleeves, they work by cutting a thread into the base material so they don't expand, avoiding cracking and you can use them in hollow brick and block. Supplied in lengths up to 150mm they are rapidly installed by driving into a 6mm hole. Available in zinc plated finish for general purpose use and on Raptr Plus fixings in our ceramic Screw Armour coating for external use. Torx drive for a solid non slip connection.

Raptr Self Tapping Concrete Sockets

Scrooz price from just

\$8.95

a pack

Ceramic
Coat

Our fantastic Raptr Sockets are internally threaded fixings designed to fix direct to concrete, brick, block and general masonry using plugless technology, plus they can also be used in timber. The internal thread means you can use them with any zinc plated or stainless steel metric bolt, threaded rod, fastener or component. Galvanised bolts and fasteners can also be used depending on coating thickness. Made from high performance high tensile 12.9 grade steel.

Screw Bolts Hex Gold Zinc Plated

As low as
\$15.45
trade box of 50

Scrooz Concrete Screw Bolts are high strength concrete and masonry screw anchors with helical threads allowing the bolt to cut it's own thread in concrete and masonry when tightened, no plugs are required and these anchors don't expand so they are ideal for hollow substrates or in masonry and concrete where cracking may be a problem. Gold screw bolts are our most cost effective anchoring solution for internal bolting and fixing of construction and engineering components.

Nylon Wall Plugs

Get them as low as

\$2.75

per 100

High quality nylon flush head corrosion and chemical resistant wall plugs are designed for use with all screw fixings in masonry and concrete, unlike plastic plugs nylon does not split so they are particularly suited for coarse thread screw applications like coach screws. Built-in load and knock in protection prevents distortion on installation, while the winged body prevents rotation in the drill hole.

316
Stainless

Sleeve anchors are quick, easy versatile masonry and concrete anchors that expand against the base material when the nut is tightened to allow for a strong connection and to help distribute load bearing weight. They can be used in a wide variety of applications from anchoring brackets to brickwork through to structural concrete anchoring applications. Available in zinc plated, galvanised and 316 marine grade stainless steel for maximum corrosion protection.

These professional grade torque controlled heavy duty expansion through bolt anchors are designed for rapid fixing of steel and timber assemblies, structural components, baseplates and brackety in concrete, rock and stone. As the name suggests these high tensile anchor bolts are made with the same drill size and body diameter to fit 'through' the fixture so you can position your bracket or baseplate, drill right through it into the concrete and fit the anchor bolt without moving it.

Professional grade drop in anchors are internally threaded anchors that provide quick and easy installation of any threaded fastener or rod into masonry, hard stone, and solid concrete. Made from high strength steel, the anchor is expanded by a matching setting tool which drives the anchors captive expansion plug fully home while protecting the internal thread from damage. Drop in anchors are a flush fit, and therefore perfect for temporary or removeable fixtures.

316
Stainless

Factory made balustrade wire systems are super popular. They're absolutely the easiest way for any customer to fit wire balustrade systems. We make the wire balustrade lengths for you, with all fittings attached and swaged, as complete assemblies so all you need to do is fit them to your timber or steel posts. All wire and fittings are manufactured from professional 316 grade stainless steel and are precision factory fitted. Turnaround time generally 48 hours from order.

Brad Point Wood Drills

From only
\$9.95
each

Precision ground, German manufactured professional woodworkers and tradesman's steel drill bits. Brad point bits drill super clean chip free holes due to the sharpened angles points and the sharp bladed drilling flute. The sharp centering point is perfect for accurate pilot holes and start positioning particularly in critical applications like finish joinery and assembly, door hinge fitting etc.
